brandbasket

BRAND GUIDELINES AND LOGO ARCHITECTURE

The Soft bB logo set

Which logo file to use for which job, on which background and at what size. Colour, type, misuse, where each asset goes, and a list of every file.

Version 1.0 · 27 October 2026
Brandbasket (brandbasket.in) is a brand of Digibranders Private Limited.

Start here

The set has 23 files: 19 numbered artworks, where number 19 comes in five favicon sizes. Every page in this guide refers to the files by their number. The full list is on pages 16 and 17.

SIX RULES

1. **Use the supplied files.** Never redraw, retype, recolour or rebuild the logo.
2. **The default is horizontal, in colour.** File 14 on light surfaces, file 15 on dark ones.
3. **Some files carry a background.** Files named on white, on rattan or on ink include their own background. On any other surface use a transparent file, 14 to 18.
4. **Prefer SVG.** Use PNG where SVG is not accepted: email, Office files and social uploads.
5. **Keep clear space.** x on every side, where x is a quarter of the mark height. Horizontal logo never narrower than 120 px.
6. **Three colours only.** Ink, rattan and white. Never add effects.

01 / ANATOMY

The logo

Soft bB has two parts: a mark and a wordmark. Both are supplied as outlined vector artwork, so no font is needed to show them.

1 **Rattan form.** A lowercase b: stem and bowl in one piece. Colour #C48A47.

2 **Ink bowl.** The upper half of a capital B. Colour #15161A.

3 **Ink crescent.** The lower half of the B. The gap between it and the rattan bowl is cut out of the artwork, so the gap shows whatever is behind the logo.

Wordmark. The lowercase name in two weights: **brand** light, **basket** heavy. It sits on the same baseline as the bottom of the mark.

07 On white: rattan b, ink B.

08 On rattan: white b, ink B.

09 On ink: rattan b, white B.

02 / WHICH LOCKUP FOR WHICH JOB

Logo architecture

Five shapes and three versions. Choose the shape from the space you have. Then choose the version from the background.

	SHAPE	USE IT FOR	DO NOT USE IT FOR	FILES
	**Horizontal** Mark on the left, wordmark on one line. About 6.4 times wider than tall.	Headers, footers, email and document headers, slide corners, signature blocks.	Square or tall spaces. Anywhere narrower than the minimum width.	01 to 03, 10, 11, 14, 15
	**Stacked** Mark centred above the wordmark. About 1.9 times wider than tall.	Square and portrait layouts: post sign-off tiles, covers, posters, sign-in screens, stickers.	Narrow bars. Small sizes: the wordmark is the limit.	04 to 06, 16, 17
	**Mark** The b and B shapes with no name.	Profile photos, small spaces, collapsed side bars, loading states, watermarks.	Anywhere the name is written nowhere else on the page or screen.	07 to 09, 18
	**App icon** The mark on a rounded square tile, in ink or in rattan.	Home screen and installed app icons, app listings.	Page layouts and documents. Use a lockup there.	12, 13
	**Favicon** The ink tile exported at 16, 32, 180, 192 and 512 px.	Browser tab (16, 32), iOS home screen (180), web app manifest (192, 512).	Anything above 512 px. Use 12 or 13.	19

Version: primary colour

Rattan and ink on light surfaces. On dark surfaces the B turns white and the b stays rattan. This is the default.

Files 01 to 09, 12, 13, 14 to 18

Version: one-colour

All ink or all white, no rattan. For print in one ink, stamps, forms and photocopies. Horizontal only.

Files 10, 11

Version: transparent

No background rectangle. The file names say which surface they are for: light or dark. Use them to place the logo on a page.

Files 14, 15, 16, 17, 18

Quick pick. Wide space on a light page: 14. Wide space on a dark page: 15. Square space: 16 on light, 17 on dark. Avatar: 09. Small mark on a light page: 18. App tile: 12. Browser tab: 19.

03 / PRIMARY LOGOS

Horizontal lockup

The default logo. Use it in any wide, low space. The mark is taller than the wordmark and both share one baseline.

01 Horizontal on white. 2400 x 1350.

02 Horizontal on rattan. 2400 x 1350.

03 Horizontal on ink. 2400 x 1350.

14 Transparent, for light backgrounds. 2400 x 405.

15 Transparent, for dark backgrounds. 2400 x 405.

HOW TO USE

- 01 to 03 are 16:9 artworks with the logo centred and the background filled edge to edge. They suit title slides, video frames and previews.
- To place the logo on a page, use 14 or 15. They have no background.
- Do not rebuild the lockup by placing the mark and wordmark yourself.

04 / PRIMARY LOGOS

Stacked lockup and mark

Both are supplied as 1600 x 1600 px squares with the artwork centred, so they work as square tiles as they are.

Stacked, 04 to 06

For square and portrait spaces. The wordmark is the same size at every stacked file, and is the part that limits how small the logo can go.

Mark, 07 to 09

The mark alone, about 38% of the canvas width, so it keeps its margin when a platform crops a profile photo to a circle.

Use the mark alone only where the name appears elsewhere, or where space is too small for a lockup.

04 Stacked on white.

05 Stacked on rattan.

06 Stacked on ink.

07 Mark on white.

08 Mark on rattan.

09 Mark on ink.

05 / OTHER VERSIONS

One-colour and transparent versions

10 One-colour, ink on white.

11 One-colour, white on ink.

One-colour, 10 and 11

All the logo in one colour. The cut-out gap in the mark still separates the shapes, so the mark reads without rattan. Use for single-ink print, stamps, forms and photocopies.

Both files include a filled background rectangle. They are not transparent. File 10 is ink (#15161A), not pure black.

14 Horizontal, for light.

16 Stacked, for light.

18 Mark, for light only.

15 Horizontal, for dark.

17 Stacked, for dark.

Transparent, 14 to 18

- No background. "For light bg" files have an ink wordmark and an ink B. "For dark bg" files have a white wordmark and a white B. The rattan b is the same in both.
- They are cropped close to the artwork, about 1% margin. Add the clear space yourself (page 9).

What is not in the set

- No transparent mark for dark surfaces. File 18 has an ink B, which disappears on ink. Use 09.
- No transparent one-colour files, and no one-colour stacked or mark files. No wordmark on its own.

06 / ICONS

App icon and favicon

The tile is a rounded square. The mark sits in the middle at about 53% of the tile width.

12 App icon, ink. 1024 x 1024.

13 App icon, rattan. 1024 x 1024.

The tile corners are transparent and the radius is baked in (14 of 64, or 21.9% of the width). That is right for a browser tab. It is wrong for iOS and the app stores, which want a square tile. See page 19.

19 / FAVICON SIZES, SHOWN AT ACTUAL PIXEL SIZE (FILES OVER 32 PX SCALED TO 33 MM)

512

192

180

32

16

SMALL SIZES, ENLARGED 16 TIMES AND 8 TIMES

16 px

32 px

At 32 px the b and B read clearly. At 16 px the gap closes, the crescent merges into the bowl and the tile reads as a coloured block more than as a bB. The 16 px file is the same artwork scaled down, with no change for the small size.

07 / SPACE AND SIZE

Clear space and minimum size

The designer did not supply these rules. They are set here from rendering tests and need the designer's confirmation.

Clear space is x on every side

x is a quarter of the height of the mark: the rattan b, which runs the full height. Nothing else enters the dashed box: no text, edges, images or other logos.

14 Horizontal, x = 1/4 of the mark height

16 Stacked

18 Mark alone

SHAPE	MINIMUM, SCREEN	MINIMUM, PRINT	SHOWN AT THE MINIMUM
Horizontal 01 to 03, 10, 11, 14, 15	120 px wide	32 mm	
Stacked 04 to 06, 16, 17	100 px wide	27 mm	
Mark 07 to 09, 18	24 px high	7 mm	
App icon 12, 13	32 px	No print use	

Below the minimum

- A horizontal logo that would be narrower than 120 px becomes the mark alone, at 24 px high or more.
- Do not shrink the stacked logo below 100 px. Use the mark.
- For the 16 px favicon see page 8 and page 19.

08 / BACKGROUNDS

Which version on which background

Pick the file from the surface it will sit on. Files named on white, on rattan or on ink are whole artworks with their own background.

14 White (#FFFFFF). Or file 01 as supplied.

14 Bone page (#F6F5F2) and the light tints sunken (#EEECE7) and rattan wash (#F4E6D3). Not 01: its white rectangle would show.

15 Ink (#15161A). Or file 03 as supplied.

02 Rattan field (#C48A47, the site's --rattan): white b, ink B and wordmark.

14 Photos and busy images: put the logo on a solid white or ink panel, with clear space.

PAIR	CONTRAST
Ink on white	18.08 : 1
Ink on bone	16.58 : 1
Rattan on white	2.97 : 1
Rattan on bone	2.72 : 1
Rattan on ink	6.09 : 1
Ink on rattan	6.09 : 1
White on rattan	2.97 : 1

Logos are exempt from the WCAG contrast rules. The ratios are given to judge legibility. The rattan b is 2.97 to 1 on white and 2.72 to 1 on bone, and the white b on a rattan field is 2.97 to 1. All are under 3 to 1, so the b depends on its size and on the ink beside it. The ink parts on a rattan field are 6.09 to 1.

09 / COLOUR

Colour

The logo uses three colours: ink, rattan and white. The rattan is the site's --rattan, so the logo and the site share one brand colour.

IN THE LOGO

Ink
#15161A · RGB 21 22 26
Wordmark, B, text. Same as --ink.

Rattan
#C48A47 · RGB 196 138 71
The b in the mark. Same as --rattan.

White
#FFFFFF · RGB 255 255 255
B and wordmark on dark. White b on rattan.

The designer's files use #B0743A. This guide shows the logo recoloured to the site's #C48A47, using copies in assets-site/. The supplied files are unchanged. The earlier logo kit used #B0743A for the mark and #C48A47 for app icon fields.

No CMYK or Pantone values were supplied with the set. Ask the printer for a proof.

Text contrast on the bone page: ink 16.58 to 1, ink-2 7.38, rattan-ink 5.66, rattan-text 4.04. Rattan-text is under 4.5 to 1, so keep it for large text.

10 / TYPE

Typography and the name

The site loads three Red Hat families in lib/fonts.ts. The wordmark inside the logo is outlined artwork and is never typed.

Aa

Red Hat Display

Headings and display text. Variable weights 300 to 900, upright and italic.

ABCDEFGHIJKLM NOPQRSTUVWXYZ
abcdefghijklm nopqrstuvwxyz 0123456789

Aa

Red Hat Text

Body copy and interface text. Variable weights 300 to 700.

ABCDEFGHIJKLM NOPQRSTUVWXYZ
abcdefghijklm nopqrstuvwxyz 0123456789

Aa

Red Hat Mono

Numbers, codes and small labels. Weights 400 and 500.

ABCDEFGHIJKLM NOPQRSTUVWXYZ
abcdefghijklm nopqrstuvwxyz 0123456789

Fonts are licensed under the SIL Open Font License (fonts/FONT-LICENSE-Red-Hat-OFL.txt). This guide is set in the same three families.

THE WORDMARK

brand**basket**

The letter shapes match Red Hat Display, with **brand** in Medium and **basket** in ExtraBold. That is how the earlier logo guide described its wordmark. The Soft bB set does not state it. Use the outlined files. Never retype it.

THE NAME IN RUNNING TEXT

Brandbasket	Correct. Capital B, one word.
BrandBasket, Brand Basket, BRANDBASKET	Not used.
brandbasket.in	The domain, always lowercase.
Brandbasket is a brand of Digibranders Private Limited	The legal line.

IN USE

Heading in Red Hat Display

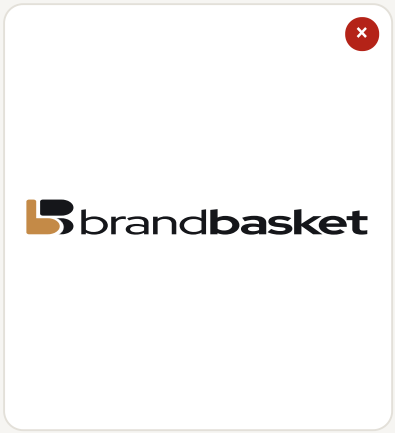

Body copy in Red Hat Text at regular weight.

LABEL 0123456789

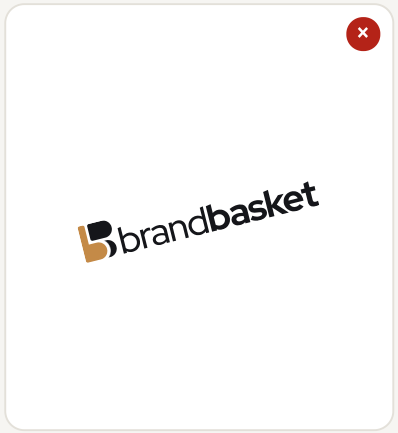

11 / DO NOT

Misuse

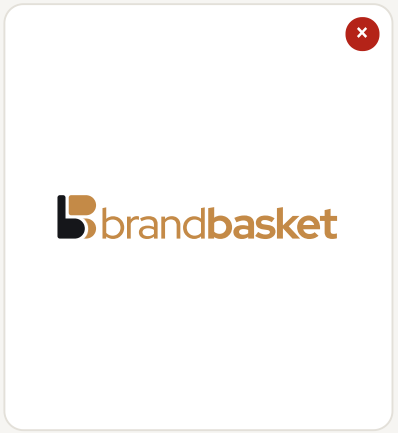

Ten things not to do. Each example is built from the real files.

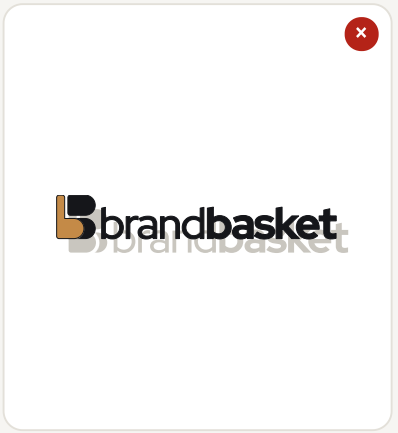

Stretch or squash

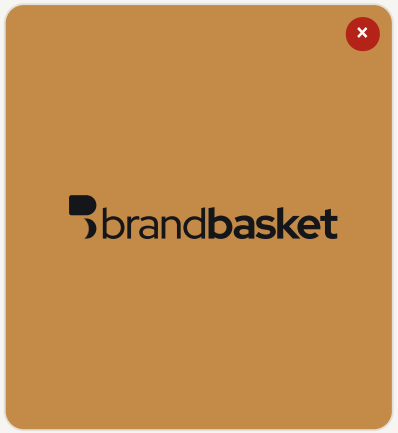

Rotate

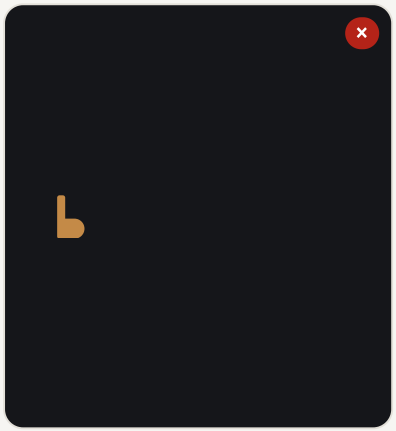

Swap the colours

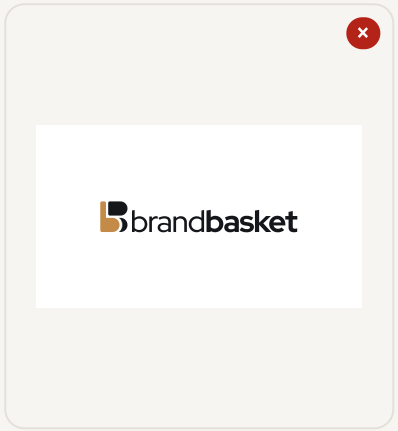

Add outlines or shadows

Colour logo on a rattan field

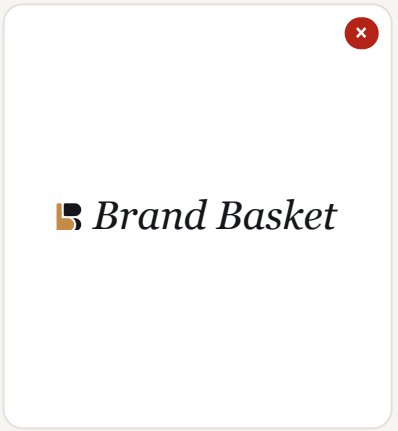

Light-background file on dark

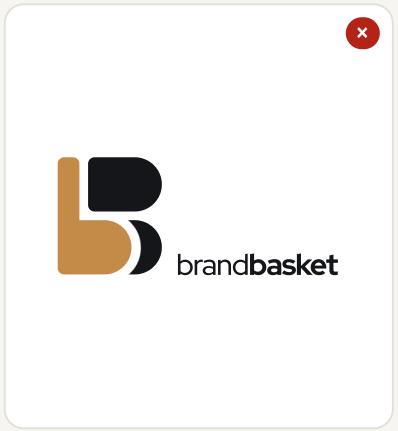

On-white artwork on the bone page

On a busy background

Retype or respace the name

Resize the parts separately

Place the supplied file as it is. If a surface is busy or off palette, put the logo on a solid white or ink panel. If no file fits the job, ask the designer for one. Do not edit the artwork.

12 / USAGE MATRIX, 1 OF 2

Where each asset is used

Website and app. Rows are recommendations from the file set and the pages and surfaces that exist today. Files are named by number.

SURFACE	SHAPE	FILE	FORMAT AND SIZE	NOTES
WEBSITE, BRANDBASKET.IN				
Header	Horizontal	14	SVG, 32 px high	On the bone page. Not 01.
Footer	Horizontal	14	SVG, 32 px high	Use 15 if the footer is dark.
Small brand mark inside a page, for example the basket card	Mark	18	SVG, about 40 px	Light surfaces only.
Browser tab	Favicon	19 (32 and 16)	PNG, 32 and 16 px	16 px is weak. No .ico or SVG favicon in the set.
iOS home screen icon	Favicon	19 (180)	PNG, 180 px	Needs a square tile, see page 19.
Web app manifest	Favicon	19 (192 and 512)	PNG, 192 and 512 px	The manifest also lists a maskable 512 icon. Not in the set.
Link preview image, 1200 x 630	Horizontal or stacked	14 or 16 on bone or white. 15 or 17 on ink	SVG, or PNG at 2x	Logo at least 200 px wide.
Blog cover images	Horizontal or mark	14 or 15. 18 for the mark	PNG	Solid panel behind it when the cover has a photo.
Email header	Horizontal	14	PNG, 2x the shown width	Many email clients do not show SVG.
APP, CUSTOMER DASHBOARD AND STAFF CONSOLE				
Top bar or side bar	Horizontal. Mark when collapsed	14. 18	SVG	Same rules on both app.brandbasket.in and console.brandbasket.in.
Sign in and empty screens	Stacked or horizontal	16 or 14	SVG	Centred, with clear space.
Installed app icon	App icon	12	PNG, 192 and 512 px	Same square tile point as the favicon.

12 / USAGE MATRIX, 2 OF 2

Where each asset is used

Social, print and documents.

SURFACE	SHAPE	FILE	FORMAT AND SIZE	NOTES
SOCIAL				
Profile photo: Instagram, Facebook, LinkedIn, Google Business Profile, WhatsApp Business	Mark on a solid square	09 (default), 08, 07	PNG, 1600 px square	Use the square artwork, not 12 or 13. Platforms crop to a circle or rounded square.
Square post sign-off tile	Stacked	04, 05 or 06	PNG, 1600 px	As supplied, 1:1.
Cover or banner image	Horizontal	14 or 15	PNG or SVG	Banner shapes differ by platform. Build your own panel.
Video end card	Horizontal	03 (or 01, 02)	PNG, 2400 x 1350	As supplied, 16:9.
Slides	Horizontal	01, 02 or 03 for title slides. 14 or 15 in a corner	PNG or SVG	As supplied, 16:9.
PRINT AND DOCUMENTS				
Letterhead, proposals, PDF reports	Horizontal	14	SVG	At least 32 mm wide.
One-ink print: stamps, forms, receipts, photocopies	Horizontal, one-colour	10 (11 on dark)	SVG	Ink only, no rattan.
Signage, stickers, vinyl	Stacked or mark	04 or 07	SVG	Cutting plotters may drop the masks in the SVG. Get outlined files first, see page 19.

Sizes are the displayed size. Export raster files at 2x the displayed size for sharp screens.

13 / FILE INDEX, 1 OF 2

File index

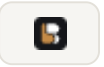

Each file comes as SVG and PNG under one name, which starts with brandbasket-soft-bB. Pixel sizes are the PNG sizes.

	NO.	NAME	PIXELS	BACKGROUND	RECOMMENDED USE
	01	**Horizontal, colour** 01-horizontal-on-white	2400 x 1350	White	Title slides, previews
	02	**Horizontal, colour, white b** 02-horizontal-on-rattan	2400 x 1350	Rattan #C48A47	Title slides, social
	03	**Horizontal, colour, white B** 03-horizontal-on-ink	2400 x 1350	Ink	Video end card, closing slide
	04	**Stacked, colour** 04-stacked-on-white	1600 x 1600	White	Square sign-off tile
	05	**Stacked, colour, white b** 05-stacked-on-rattan	1600 x 1600	Rattan #C48A47	Square social tile
	06	**Stacked, colour, white B** 06-stacked-on-ink	1600 x 1600	Ink	Square social tile
	07	**Mark, colour** 07-mark-on-white	1600 x 1600	White	Profile photo, light
	08	**Mark, colour, white b** 08-mark-on-rattan	1600 x 1600	Rattan #C48A47	Profile photo, rattan
	09	**Mark, colour, white B** 09-mark-on-ink	1600 x 1600	Ink	Profile photo, default
	10	**Horizontal, one-colour ink** 10-horizontal-one-colour-black	2400 x 1350	White rectangle	One-ink print
	11	**Horizontal, one-colour white** 11-horizontal-one-colour-white	2400 x 1350	Ink rectangle	One-ink print on dark
	12	**App icon, ink tile** 12-app-icon-ink	1024 x 1024	Ink tile, clear corners	App and home screen icon

13 / FILE INDEX, 2 OF 2

File index

Files 13 to 19. Number 19 is one artwork in five sizes.

	NO.	NAME	PIXELS	BACKGROUND	RECOMMENDED USE
	13	**App icon, rattan tile** 13-app-icon-rattan	1024 x 1024	Rattan tile, clear corners	Alternate app icon
	14	**Horizontal, transparent** 14-horizontal-transparent-for-light-bg	2400 x 405	None. For light backgrounds	Default for pages
	15	**Horizontal, transparent** 15-horizontal-transparent-for-dark-bg	2400 x 405	None. For dark backgrounds	Default on dark
	16	**Stacked, transparent** 16-stacked-transparent-for-light-bg	1600 x 879	None. For light backgrounds	Sign in, covers
	17	**Stacked, transparent** 17-stacked-transparent-for-dark-bg	1600 x 879	None. For dark backgrounds	Sign in, covers on dark
	18	**Mark, transparent** 18-mark-transparent	1024 x 1024	None. Light surfaces only	Small mark on a page
	19 / 16	**Favicon 16** 19-favicon-16	16 x 16	Ink tile, clear corners	Browser tab, weak
	19 / 32	**Favicon 32** 19-favicon-32	32 x 32	Ink tile, clear corners	Browser tab
	19 / 180	**Favicon 180** 19-favicon-180	180 x 180	Ink tile, clear corners	iOS home screen
	19 / 192	**Favicon 192** 19-favicon-192	192 x 192	Ink tile, clear corners	Web app manifest
	19 / 512	**Favicon 512** 19-favicon-512	512 x 512	Ink tile, clear corners	Web app manifest

Location: brandbasket-website/public/brand/soft-bB/svg and /png. Copies are in brand/guidelines/assets (as supplied) and assets-site (rattan recoloured to #C48A47, used in this guide).

14 / OLD TO NEW

What the set replaces

The earlier kit (brand/logo, October 2026) used the Basket Pin: a map pin with a woven basket inside. Soft bB replaces it. This is what carries over and what does not.

EARLIER FILE	SOFT BB	NOTE
lockup-horizontal-light	14	Same job. New artwork.
lockup-horizontal-dark	15	Rattan stays the same on dark. No light rattan.
lockup-horizontal-ink, lockup-horizontal-white	10, 11	Now include a background rectangle.
lockup-stacked-light, lockup-stacked-dark	16, 17	
lockup-stacked-ink, lockup-stacked-white	None	No one-colour stacked.
mark-rattan, mark-rattan-light	18, 08, 09	18 is for light surfaces only.
mark-ink, mark-white	None	07 to 09 are squares with a background.
mark-small-* (below 32 px)	None	No small-size mark. See page 19.
wordmark-ink, wordmark-white, wordmark-bone	None	No wordmark on its own.
favicon: .ico, .svg, 16, 32, 48, 180, 192, 512, maskable, manifest, head snippet	19	PNG and SVG at 16, 32, 180, 192, 512. No .ico, 48, maskable, manifest or snippet.
social: avatars (ink, paper, rattan) and the Open Graph image	07 to 09	No avatar or share image files.

COLOUR

- Ink #15161A: kept.
- Rattan: the earlier mark was #B0743A, with a light rattan #D6A465 on dark. Soft bB has one rattan on light and dark. This guide shows it as the site's #C48A47. The supplied files use #B0743A.
- The earlier rattan field #C48A47 for app icons and avatars is unchanged.
- Bone wordmark #EEEBE5 on dark: now white.

TYPE

The earlier guide named Red Hat Display for the wordmark, Medium and ExtraBold, tracked at -3.5%. The new wordmark looks the same. The site families do not change.

RETIRE

The one-page Brandbasket-Logo-Guide.pdf and the brandbasket-logo-kit.zip describe the Basket Pin. This guide replaces the guide. The kit stays as an archive.

15 / FINDINGS

Open points for the designer

Found by opening every file in the set. Nothing is clipped, off-centre or in the wrong colour: all artworks sit within 5 px of centre, and the visible fills are only #15161A, #B0743A (recoloured here to #C48A47) and #FFFFFF.

LEVEL	FINDING	WHAT I SAW	ASK
HIGH	**Supplied files use a different rattan than the site**	The supplied files use #B0743A everywhere, including the field in files 02, 05, 08 and 13. The site's --rattan is #c48a47, and #B0743A is not a token in globals.css. This guide shows the logo recoloured to #c48a47. On that colour the rattan b on white and the white b on a rattan field are both 2.97 to 1, down from 3.89 to 1.	Ask the designer to reissue the set in #c48a47, or to confirm the recolour. Until then use the recoloured copies in assets-site/.
HIGH	**App icons and favicons have baked-in rounded corners**	Files 12, 13 and every 19 size have transparent corners. iOS shows transparent areas of a home screen icon as black. The app stores want a square tile. The site manifest lists a maskable icon, which needs a full-bleed square.	Ask for square, full-bleed tiles at 180, 192, 512 and 1024 px. The mark already sits in the middle 53%, so only the tile changes.
HIGH	**The 16 px favicon is not readable**	The gap closes and the crescent merges into the bowl (page 8). The 16 px file is the same artwork scaled down. There is no .ico file.	Ask for a simplified small mark for 16 and 32 px, with thicker shapes and a wider gap, as the earlier kit had, plus a .ico.
MEDIUM	**Missing versions**	No transparent mark for dark surfaces (18 has an ink B that disappears on ink). No transparent one-colour files: 10 and 11 carry a background rectangle. No one-colour stacked or mark. No wordmark alone.	Ask for: 18 for dark, 10 and 11 transparent, one-colour stacked and mark, wordmark alone.
MEDIUM	**SVGs use masks and nested svg**	Every SVG cuts the gap with an SVG mask, and the lockups nest an svg in an svg. Browsers handle it. Some print, cutting, embroidery, Office and design-import tools drop or misread masks.	Ask for a second SVG set with the gap as real outlines: flat compound paths, no masks.
MEDIUM	**No spacing or size rules, no print colours**	The set has no clear space, minimum size or CMYK and Pantone values. Page 9 sets clear space and sizes from rendering tests.	Ask the designer to confirm or correct page 9, and to supply print colours.
LOW	**Em dash in SVG metadata**	Each SVG title and aria-label joins 'Brandbasket logo' and 'Soft bB' with an em dash. Harmless when the file is used as an image. It breaks the no-dash rule if an SVG is ever inlined.	Ask for plain titles, or strip them in the build.
LOW	**File 10 is ink, not black**	The 'one-colour black' file is #15161A, not pure black.	Fine for screens. Ask for pure black for print.
LOW	**Uneven crop on transparent files**	File 14 and 15 have 26 px left, 27 px right, 20 px top and 16 px bottom of margin on a 2400 x 405 canvas.	Not a problem in use. Mention it.
